EDUCATION

University of North Carolina at Chapel Hill

Bachelor of Science, Computer Science, 3.8 GPA, Dean's List

Expected May 2027

Chapel Hill, NC

- Relevant Coursework: Modern Web Programming, Foundations of Software Engineering, Software Engineering Lab, Algorithms and Analysis, Systems Fundamentals

WORK EXPERIENCE

Sheetz

Associate Software Engineer Intern

May 2025 – Present

Pittsburgh, PA (remote)

- Improved data quality across more than 2,000 database tables by identifying and removing corrupted or incomplete records and using AI-assisted documentation to enhance data discoverability company-wide.
- Built an automated CI/CD Python job that runs after each pull request to validate data integrity and ensure long-term reliability across production releases.
- Redesigned and optimized data pipelines to eliminate duplication, improve analytics accuracy, and strengthen insights.
- Collaborated in an Agile environment, performing peer code reviews and maintaining best practices for scalable, maintainable data solutions.
- Asked to return part-time following successful internship term
- Python, SQL, Databricks, Git, AWS, Tableau, Power BI

PROJECTS

Pediatric Blue Book: [Pediatricbluebook.com](https://pediatricbluebook.com)

November 2025

- Partnered with pediatric dieticians to create a HIPAA-compliant Next.js platform that replaces manual nutrient math with automated calculations and database-powered formula building. Designed secure PostgreSQL workflows that deliver ideal nutrient targets, printable formula plans, and rapid access to formulas, greatly simplifying dietician decision-making.
- TypeScript, Next.js, PostgreSQL, Data Security, Client Communication

North Star: [North-star-alpha.vercel.app](https://north-star-alpha.vercel.app)

September 2025

- Developed an AI-powered personal finance dashboard using TypeScript, Next.js, and the Gemini API with dedicated sections for budgeting and investing. The platform analyzes user inputs such as income, location, and expenses to generate personalized budgets and AI-driven stock recommendations, and includes a finance-focused chatbot for real-time guidance. Built for a hackathon and awarded 2nd place in the financial innovation category.
- TypeScript, Next.js, AI Integration, Data Modeling

Magic Hour Portraits: [Magichourportraits.com](https://magichourportraits.com)

May 2025

- Developed a custom full-stack photography portfolio platform with TypeScript, Next.js, Tailwind CSS, and PostgreSQL, including admin workflows for project uploads and blog management. The site attracts 200+ monthly visitors and has doubled client acquisition.
- TypeScript, Next.js, Tailwind CSS, API Development

UNIVERSITY LEADERSHIP

Computer Science and Social Good

Project Manager

- Led a team of 8 developers to deliver a pet-matching web app for a nonprofit, managing sprints, stakeholders, and technical decisions. Built the web scraping pipeline and matching engine, increasing adoption engagement.

SKILLS & INTERESTS

- **Programming Languages:** TypeScript, Python, Java, SQL
- **Frameworks & Tools:** Next.js, React, Angular, Tailwind CSS, PostgreSQL, Databricks, AWS, Docker, Git
- **Interests:** Reinforcement Learning, Web Development, Rock Climbing, Running
